Philadelphia, PA

Professional Summary

Information Science PhD candidate at Drexel University studying Human-AI interaction and conversational user interfaces. My research examines how AI systems can support reflection, connection, safety, and meaningful communication. I also teach undergraduate computing and information science courses and create educational content about AI.

Research Interests

Conversational User Interface Design · Human-AI Interaction · Machine Learning · Natural Language Processing

Teaching Experience

Instructor of Record · Drexel University

- **2026, Summer** INFO 310, Human-Centered Design Process and Methods, Online
- **2026, Spring** INFO 150, Ubiquitous Computing
- **2026, Winter** INFO 310, Human-Centered Design Process and Methods

Activity-based instruction grounded in real-world scenarios. Worksheet-driven learning supports immediate application of concepts, with clear structure and low-anxiety grading.

Selected Teaching Evaluations

- INFO 310, Fall 2025. Overall course rating 4.83/5 and instructor rating 4.67/5.
- INFO 150, Spring 2026. Overall course rating 4.58/5 and instructor rating 4.58/5.

Teaching Assistant

- **Sep-Dec 2025** Introduction to Computing and Security Technology, Drexel University
 - **Feb-Jul 2022** Speech and Natural Language Processing, Khajeh Nasir Toosi University of Technology
 - **Oct-Dec 2021** Machine Learning, Khajeh Nasir Toosi University of Technology
-

Education

- **2023-Present** PhD in Information Science, Drexel University
 - **2020-2023** MSc in Computer Engineering, Artificial Intelligence and Robotics, Khajeh Nasir Toosi University of Technology
 - **2016-2020** BAsC in Mechanical Engineering, Iran University of Science and Technology
-

- **2020** Rezaee, M., Namvarpour, M., Yeganegi, A., and Ghassemi, H. "Comprehensive Study of Monatomic Fluid Flow through Elliptical Carbon Nanotubes." *Physics of Fluids*, 32(9).

Thesis and Selected Academic Work

2020-2023, Master's Thesis *Speech Emotion Recognition Using Neural Attention-Based Architectures*

Developed and evaluated four deep learning architectures, including CNNs and transformer-based models, for automatic emotion recognition in speech. Achieved 94.8% accuracy on EMODB and strong performance on IEMOCAP and ShEMO datasets.

Honors and Awards

- **2026** Outstanding Research Assistant Award, Department of Information Science, Drexel University
- **2025** Honorable Mention Award, ACM SIGCHI Conference on Computer-Supported Cooperative Work and Social Computing
- **2018** Finalist, LG Global Challenger Competition
